Artech Belts is a trusted industrial supplier based in Riyadh, Saudi Arabia, with a focus on Various industrial belts. We provide tailored solutions for diverse industrial applications, ensuring clients receive not only the right parts but also the right technical guidance without compromising the quality.

Artech Belts is a branch of Artech International, a reputable company with a strong track record in civil, interior and electromechanical works. With over 150 professionals and years of experience in industrial projects, especially in the food and beverage sector, Artech International brings valuable support, expertise and reliability to our operations.

# Our Vision

To be recognized as a reliable and preferred partner in the industrial sector by offering high-quality components, timely delivery, and personalized support that help clients meet their operational goals.

# Our Mission

- Deliver durable, high-performance Industrial belts
- Maintain fast and reliable delivery across Saudi Arabia
- Provide technical guidance and After - delivery support
- Expand our product line to meet the changing needs of various industries
- Build long-term partnerships through integrity, service, and quality

## Why Us?

- **Comprehensive Product Range:** From common spares to custom-fit solutions
- **Reliable Quality:** All components are tested for durability and industry compatibility
- **Technical Support:** We assist in product selection, installation, and troubleshooting
- **Client-Focused Approach:** Clear communication and accountability at every step

# Our Products

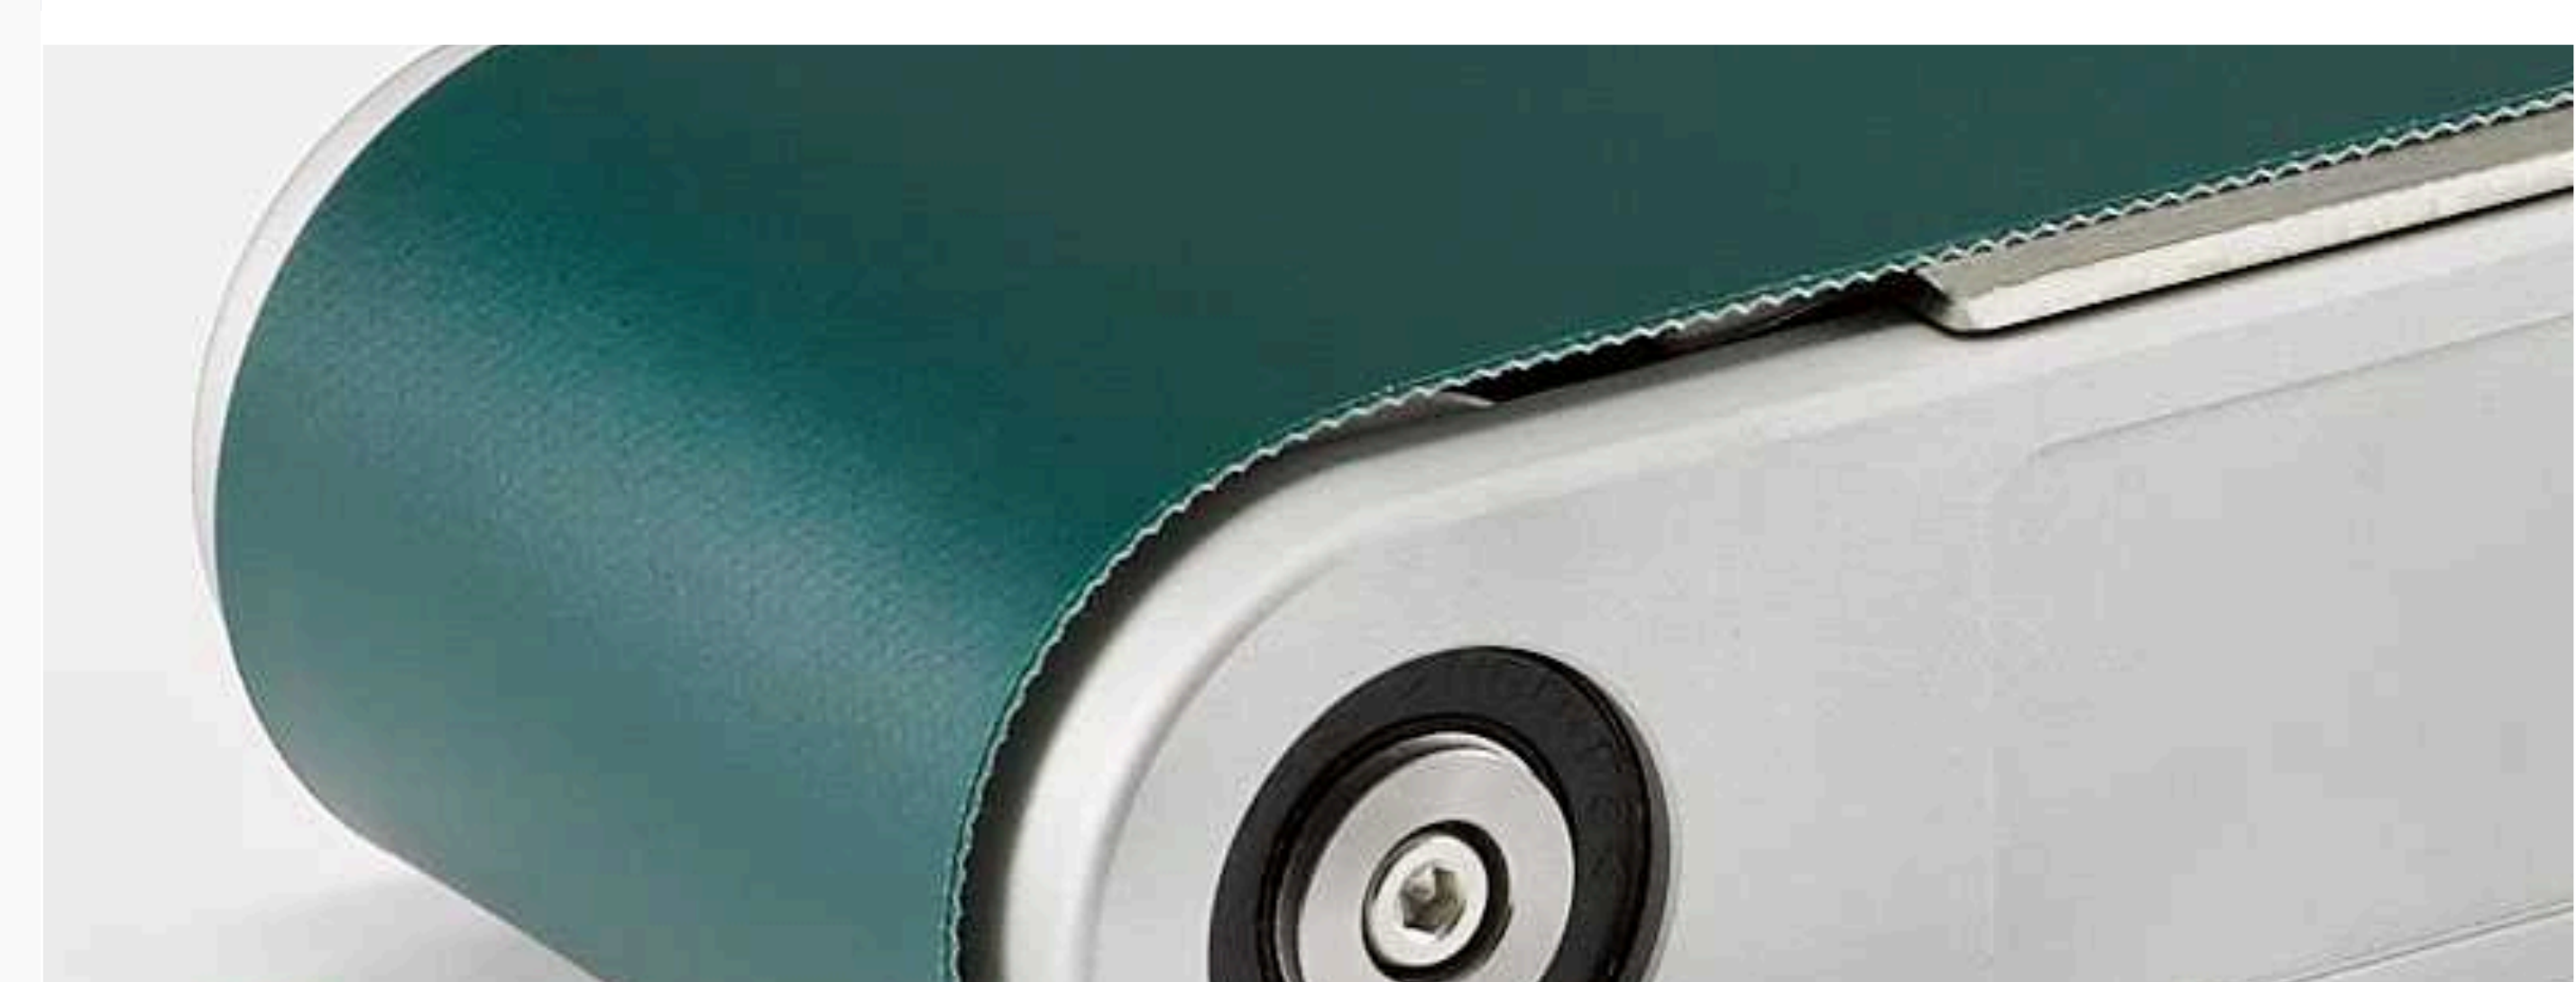

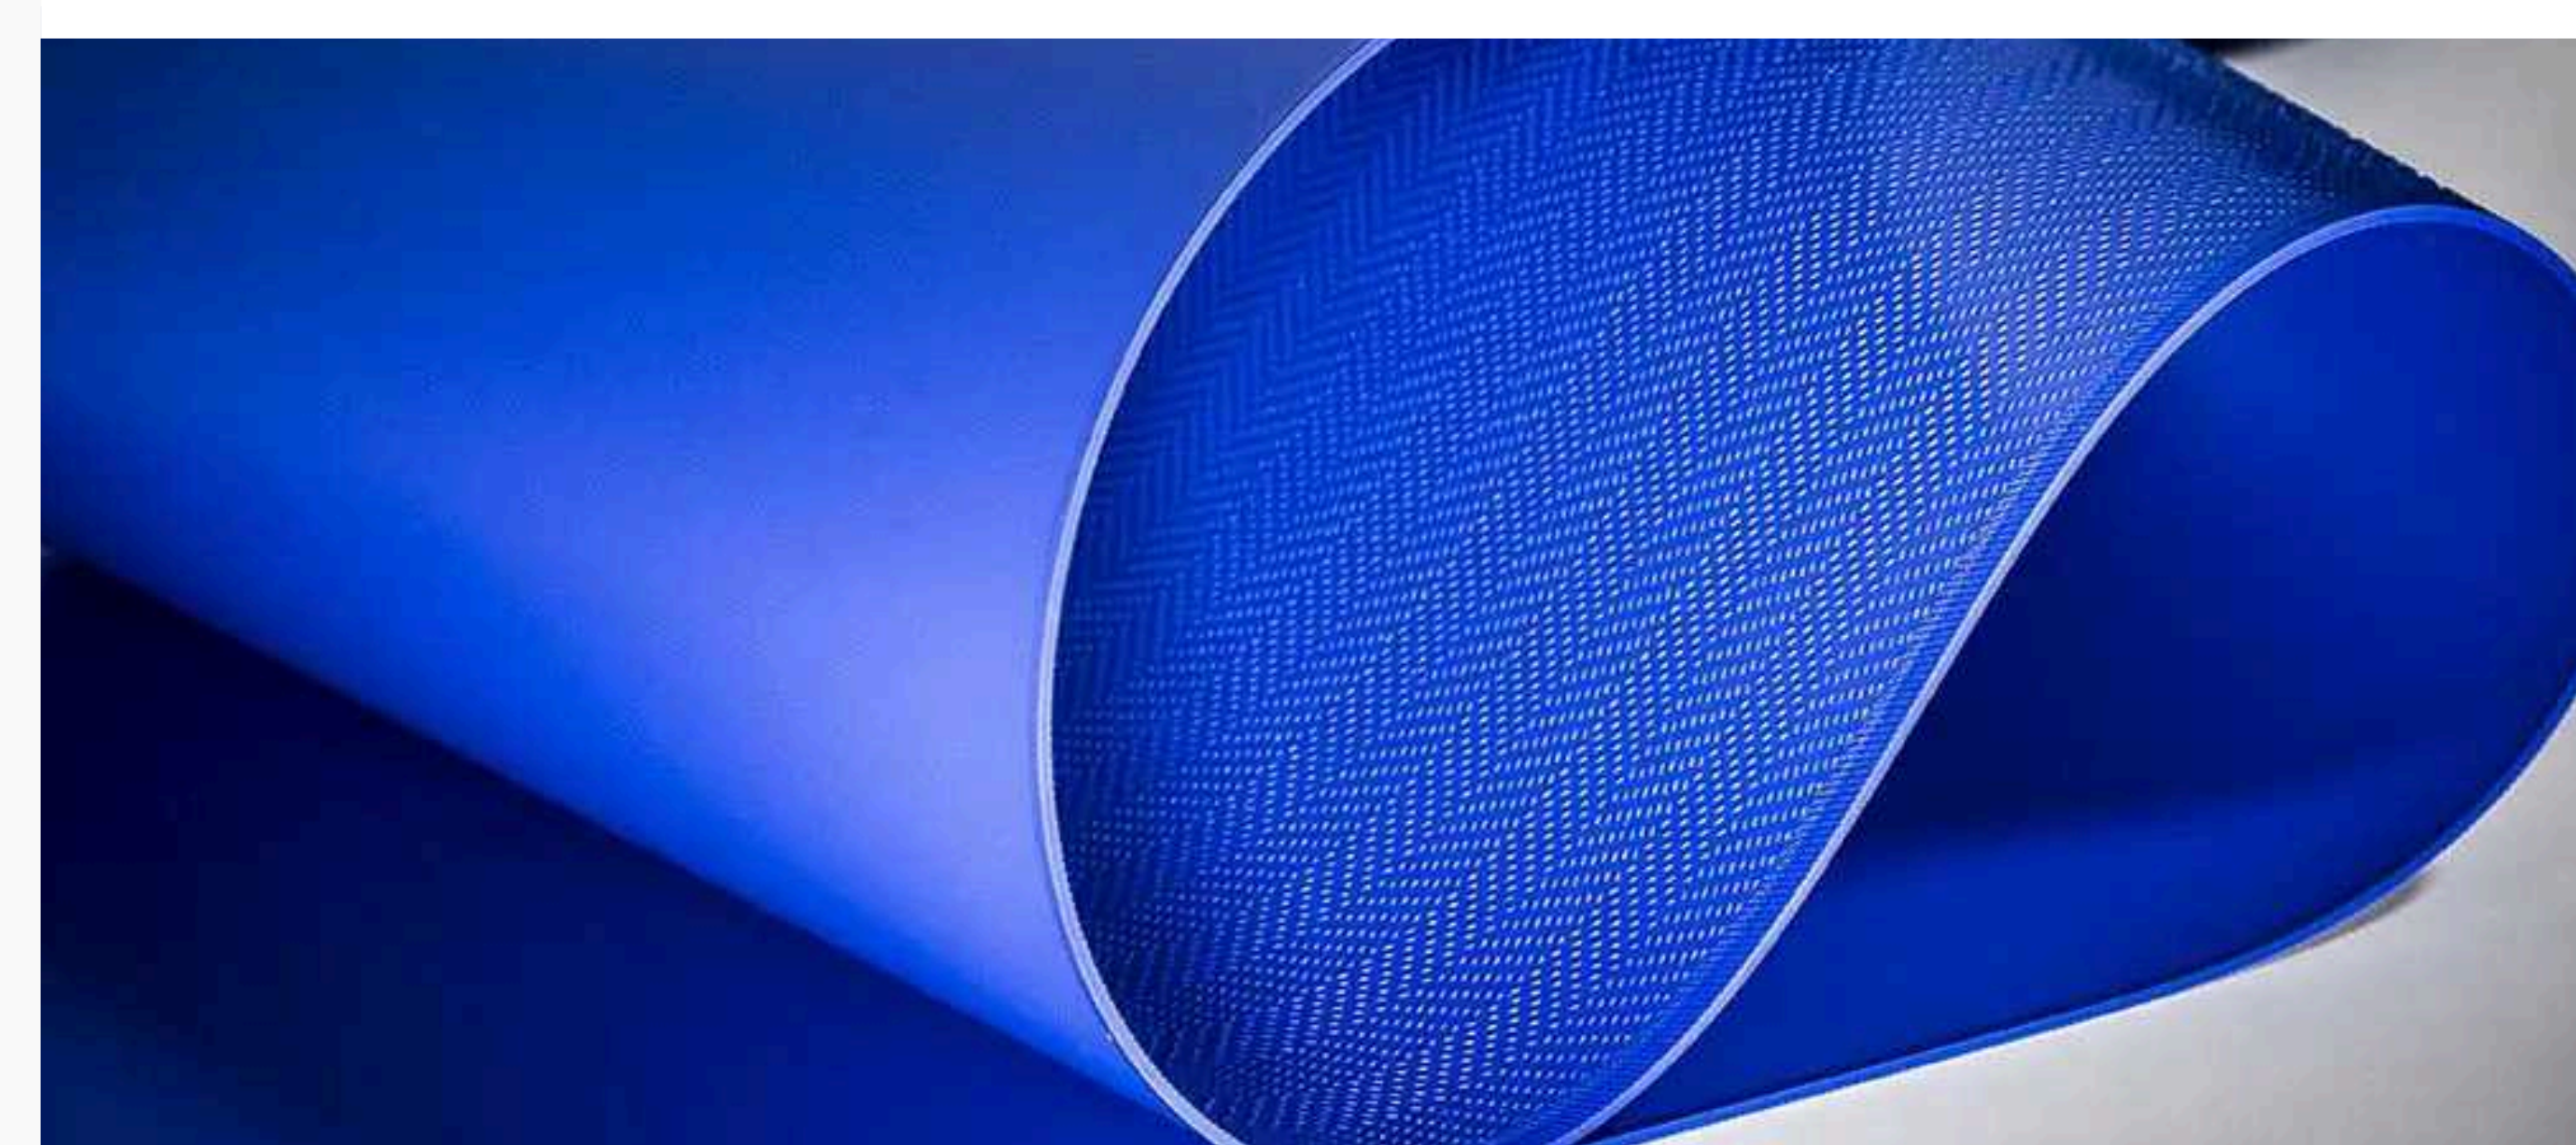

At Artech Belts, we offer a complete portfolio of products, carefully selected for their reliability, efficiency, and compatibility with diverse industrial machinery — serving a wide range of sectors including food processing, manufacturing, packaging, and beverage industry.

## Belts

Our belts are crafted using quality materials and tested to ensure reliable performance across various industrial applications. Designed to offer durability and efficiency, they help maintain consistent operation with minimal downtime.

## Conveyor Belts

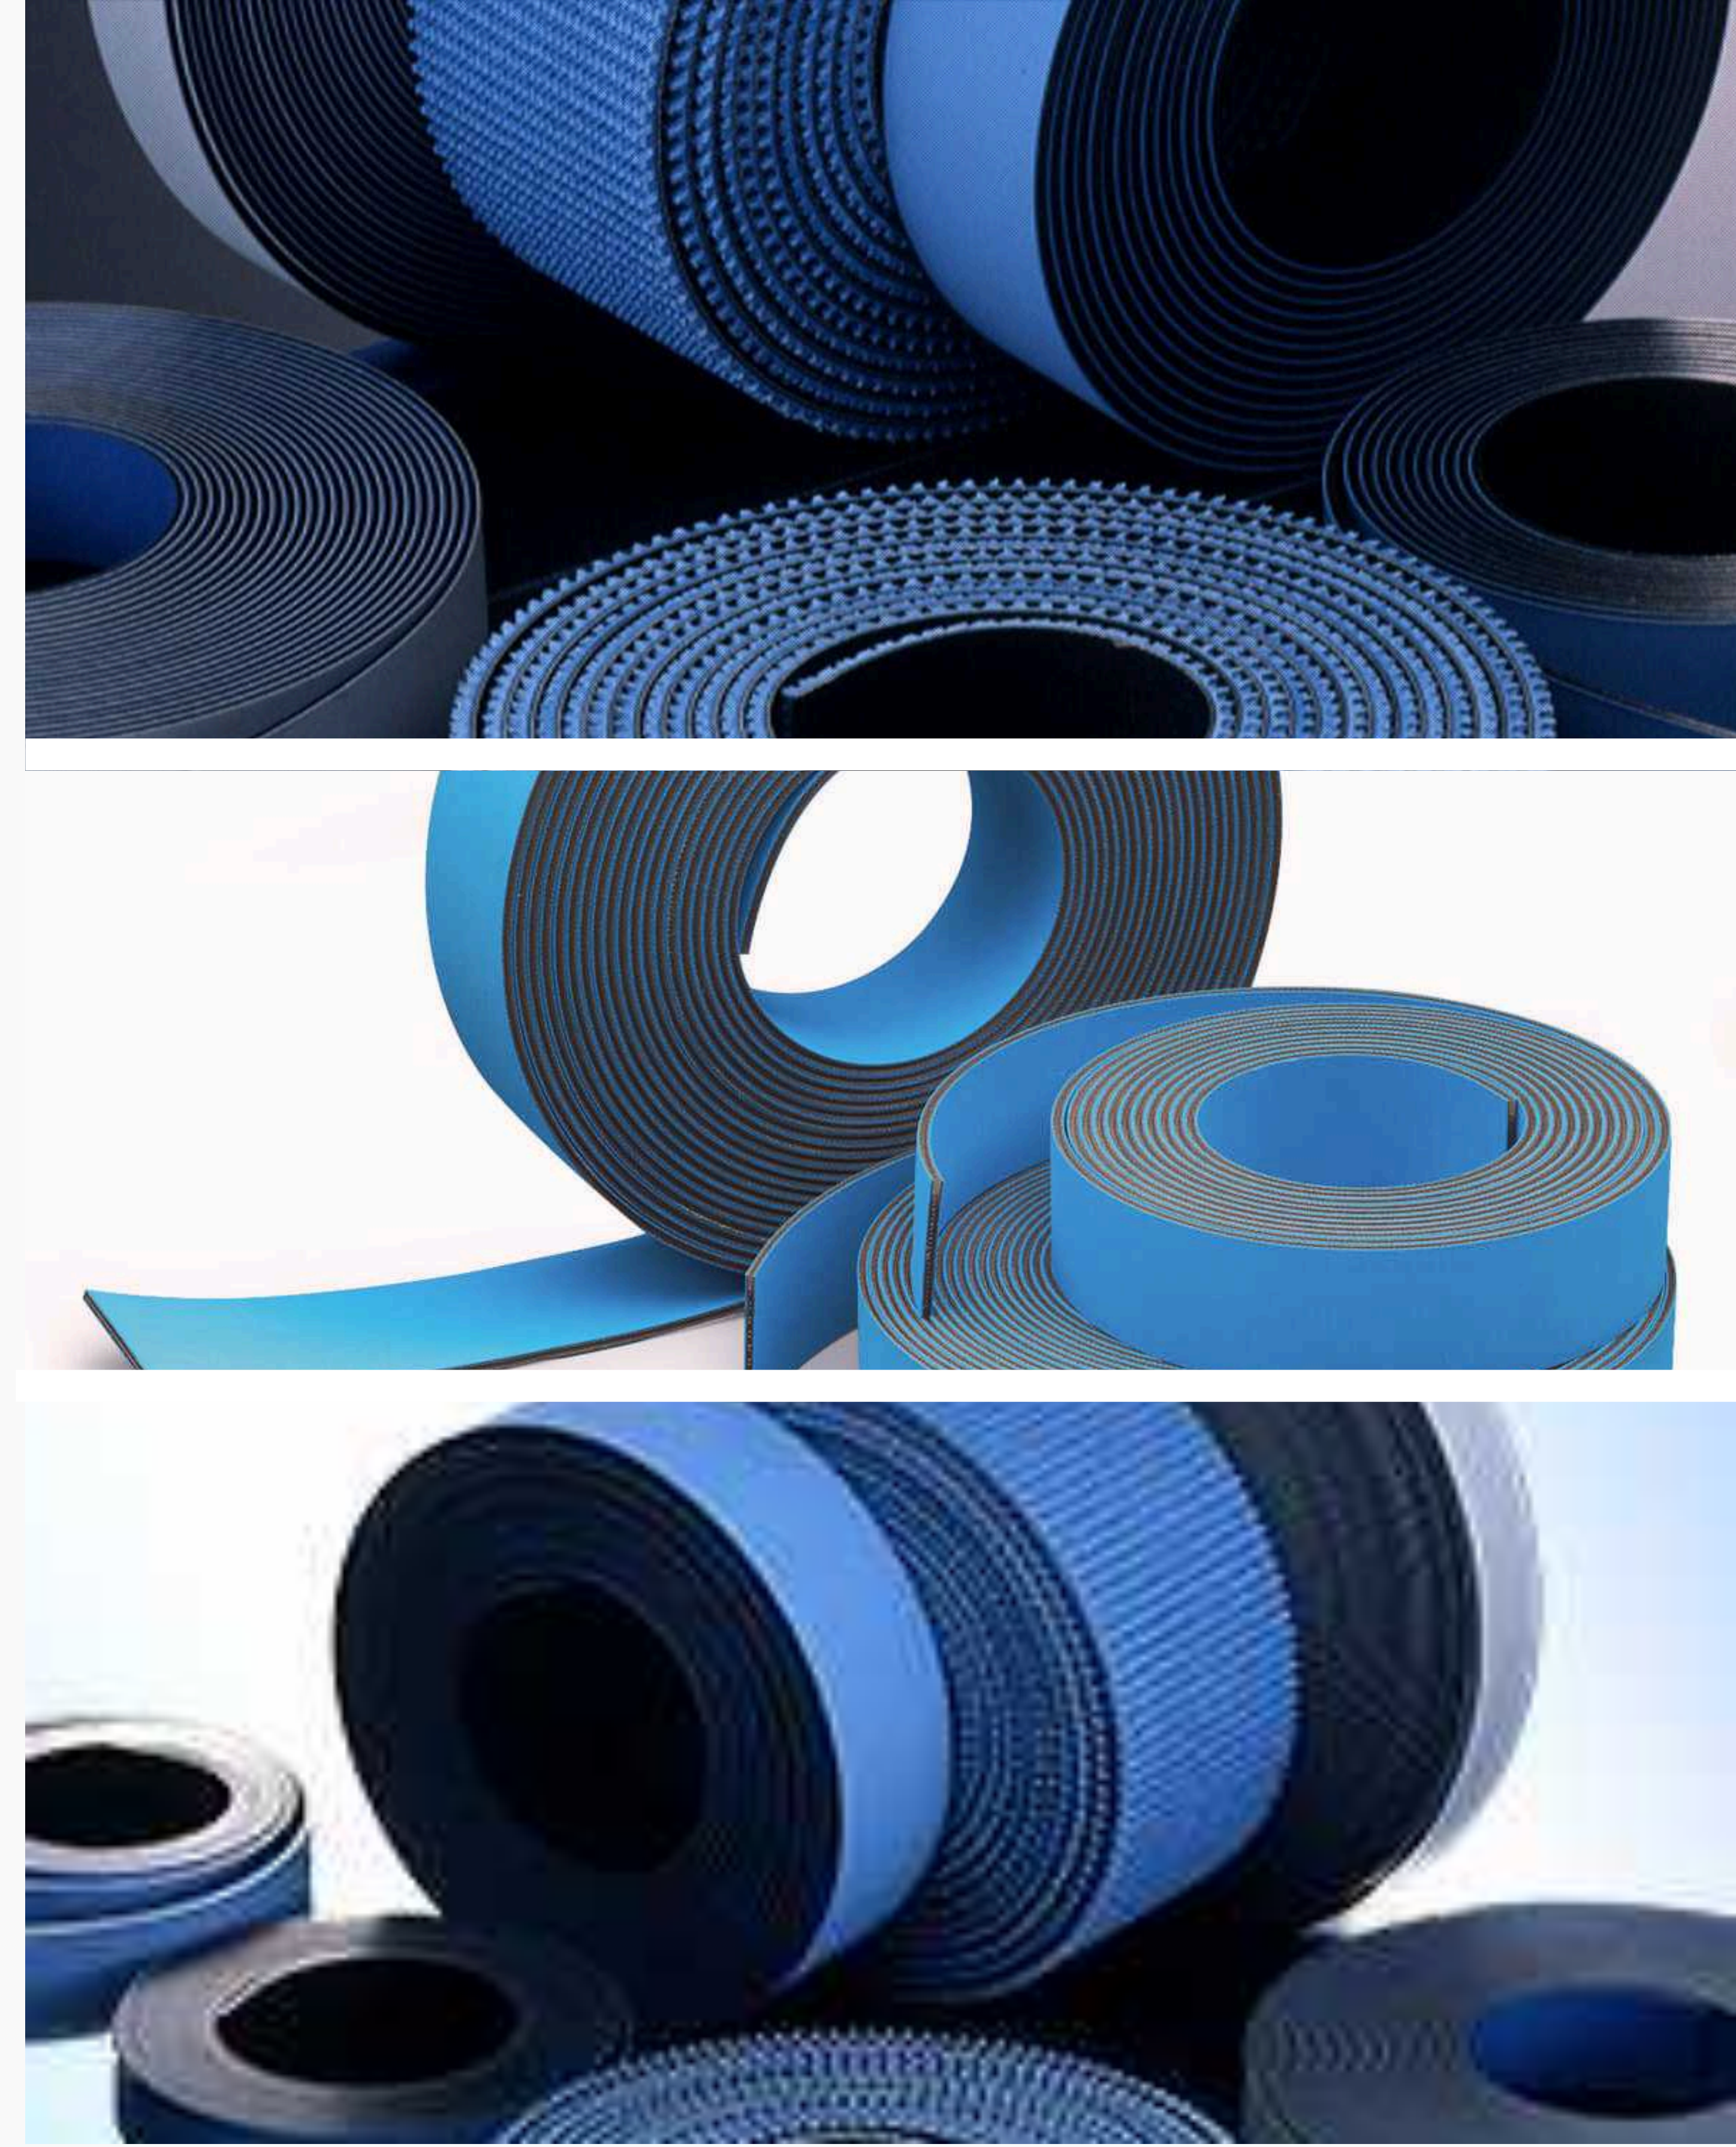

PVC, PU, and Modular types for packaging, logistics, and food-grade systems. Built for durability, smooth operation, and easy maintenance in demanding environments.

# Power Transmission Belts

Artech Belts provides high-performance transmission belts—including polyamide flat belts, seamless belts, machine tapes, and aramid belts—engineered for open, tangential, and multi-pulley drives, offering superior efficiency, flexibility, and durability across demanding industrial applications.

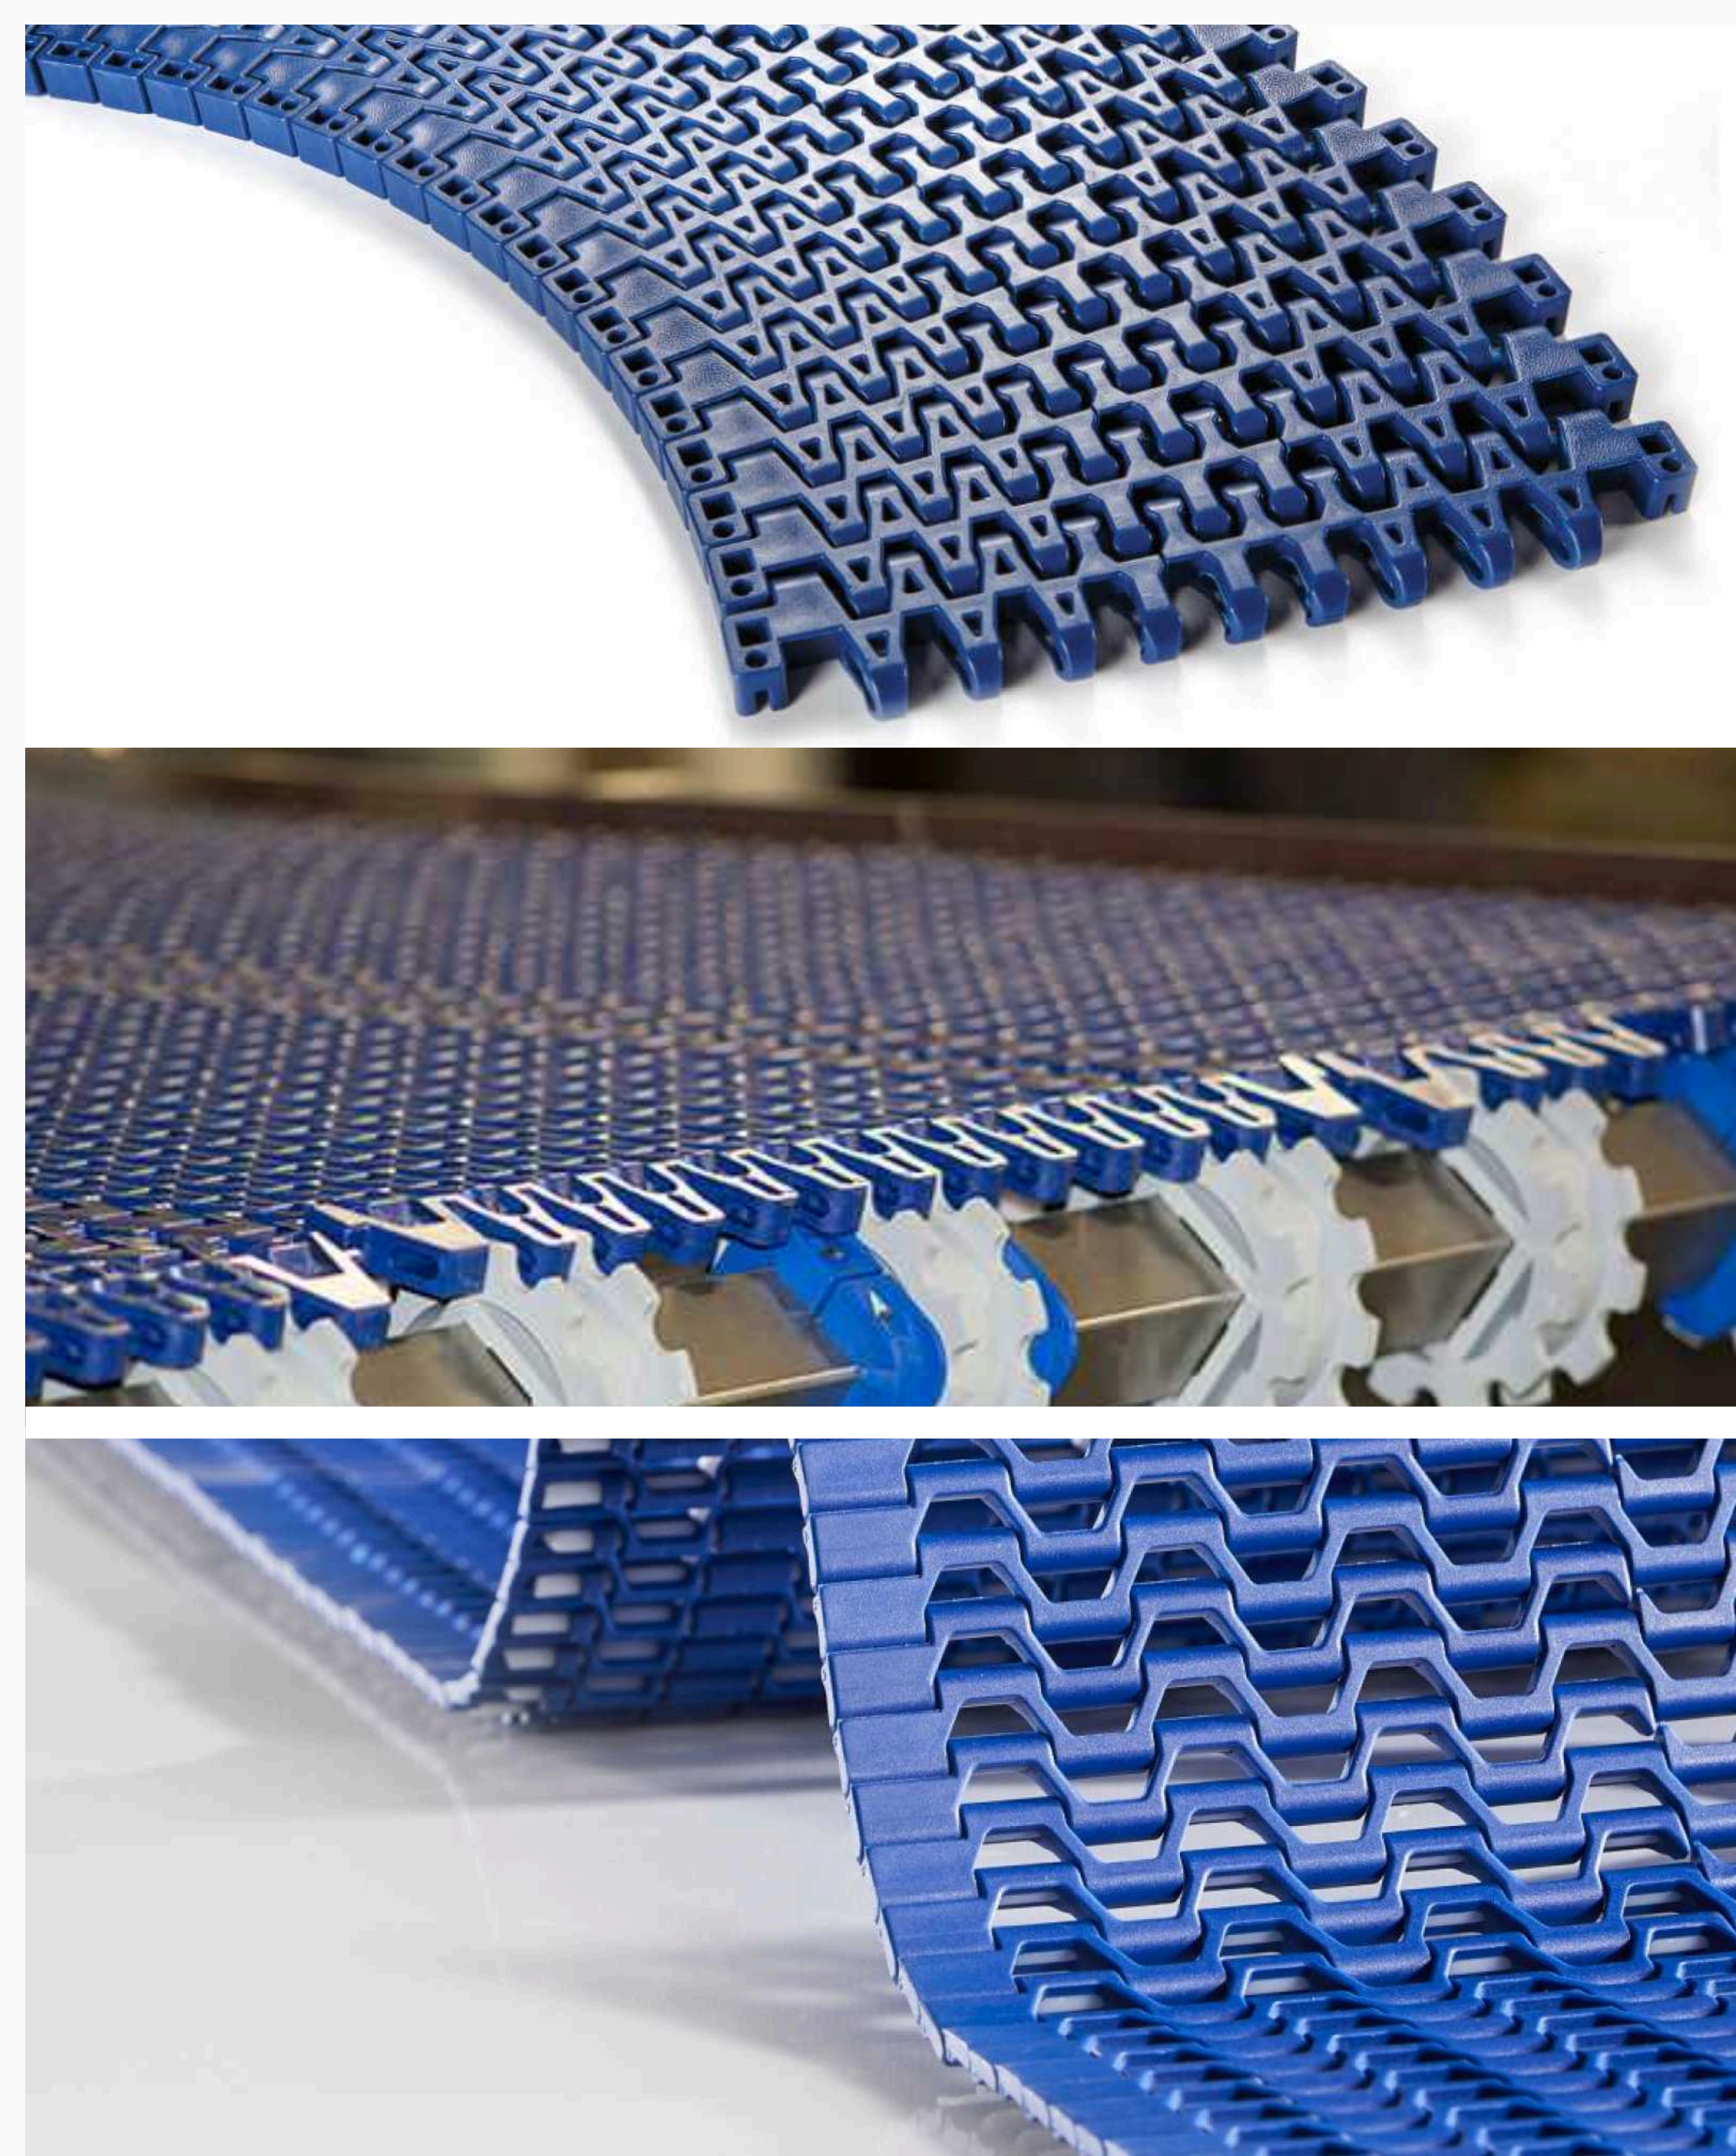

# Timing Belts

We supply high-precision polyurethane and rubber timing belts for linear motion, synchronized conveying, and power transmission. Our PU belts offer durability, flexibility, and customization, while our seamless and jointed variants meet specific speed and positioning needs.

# Modular Belts

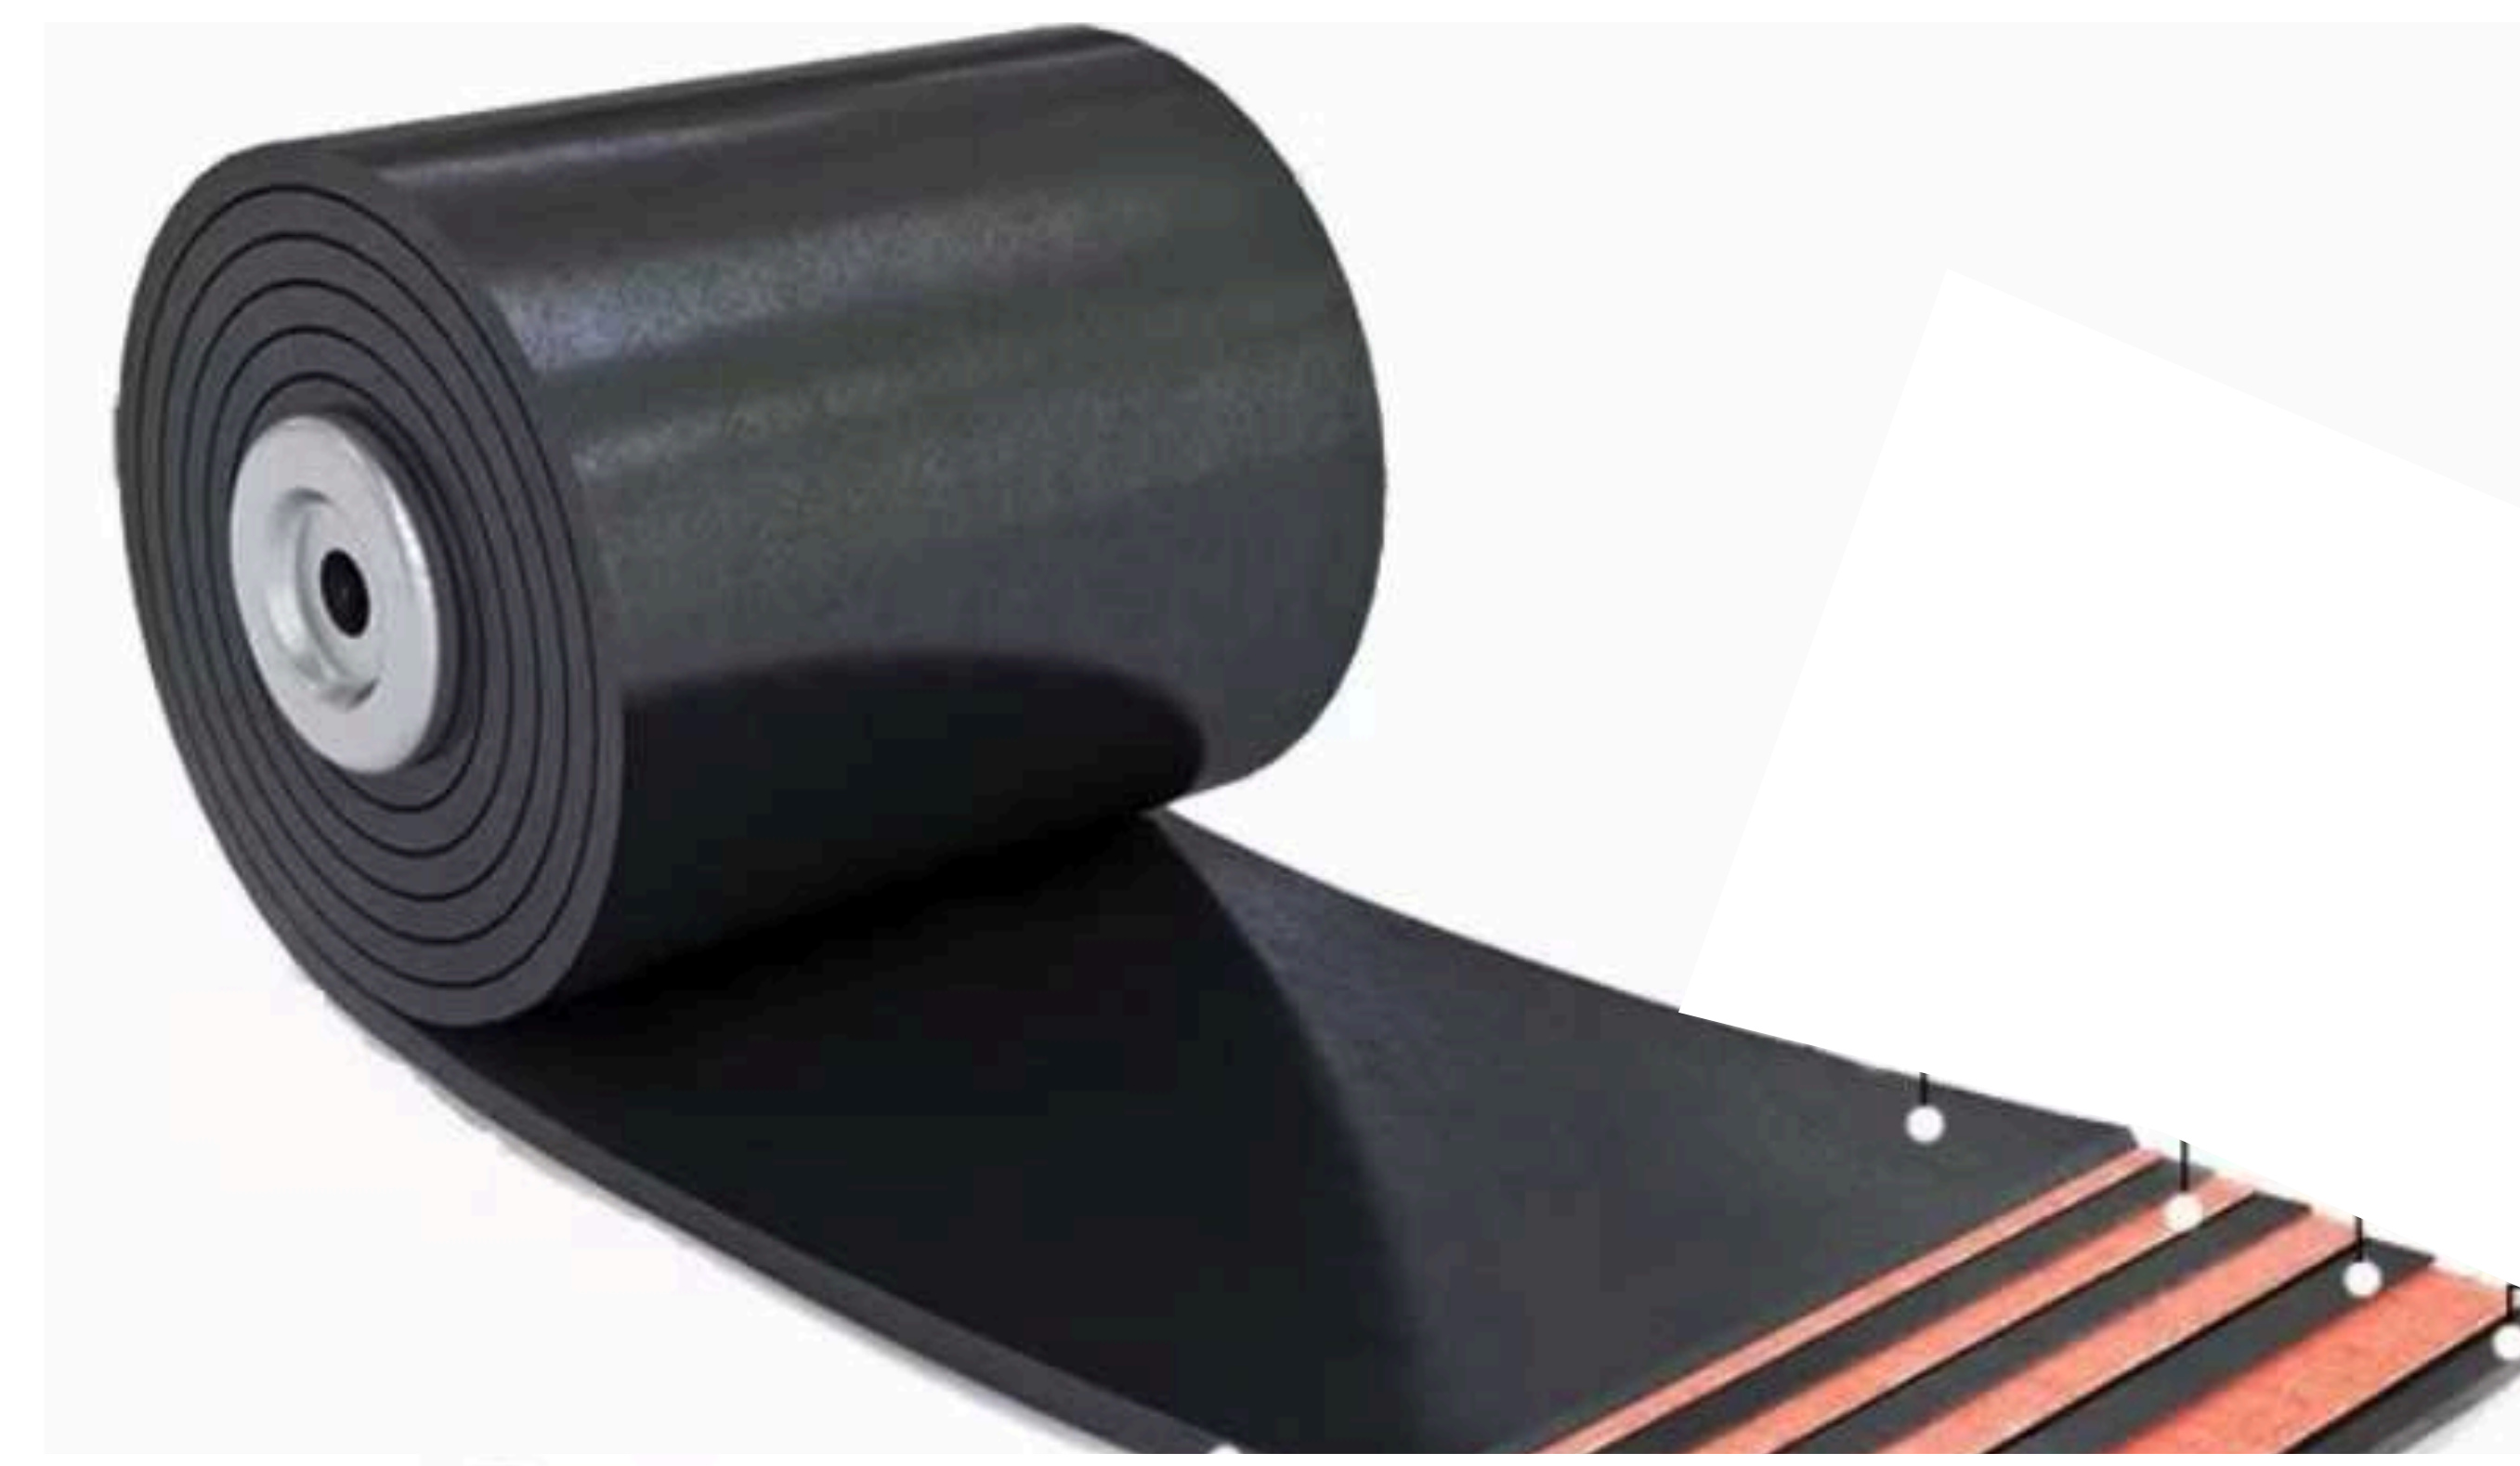

We offer durable, hygienic plastic modular belts engineered for efficient, reliable conveying. Their sprocket-driven design ensures accurate tracking and minimal downtime, while corrosion-resistant construction simplifies cleaning and boosts safety. Ideal for food and industrial use, with FDA-approved materials and customizable open-area options for drainage and strength.

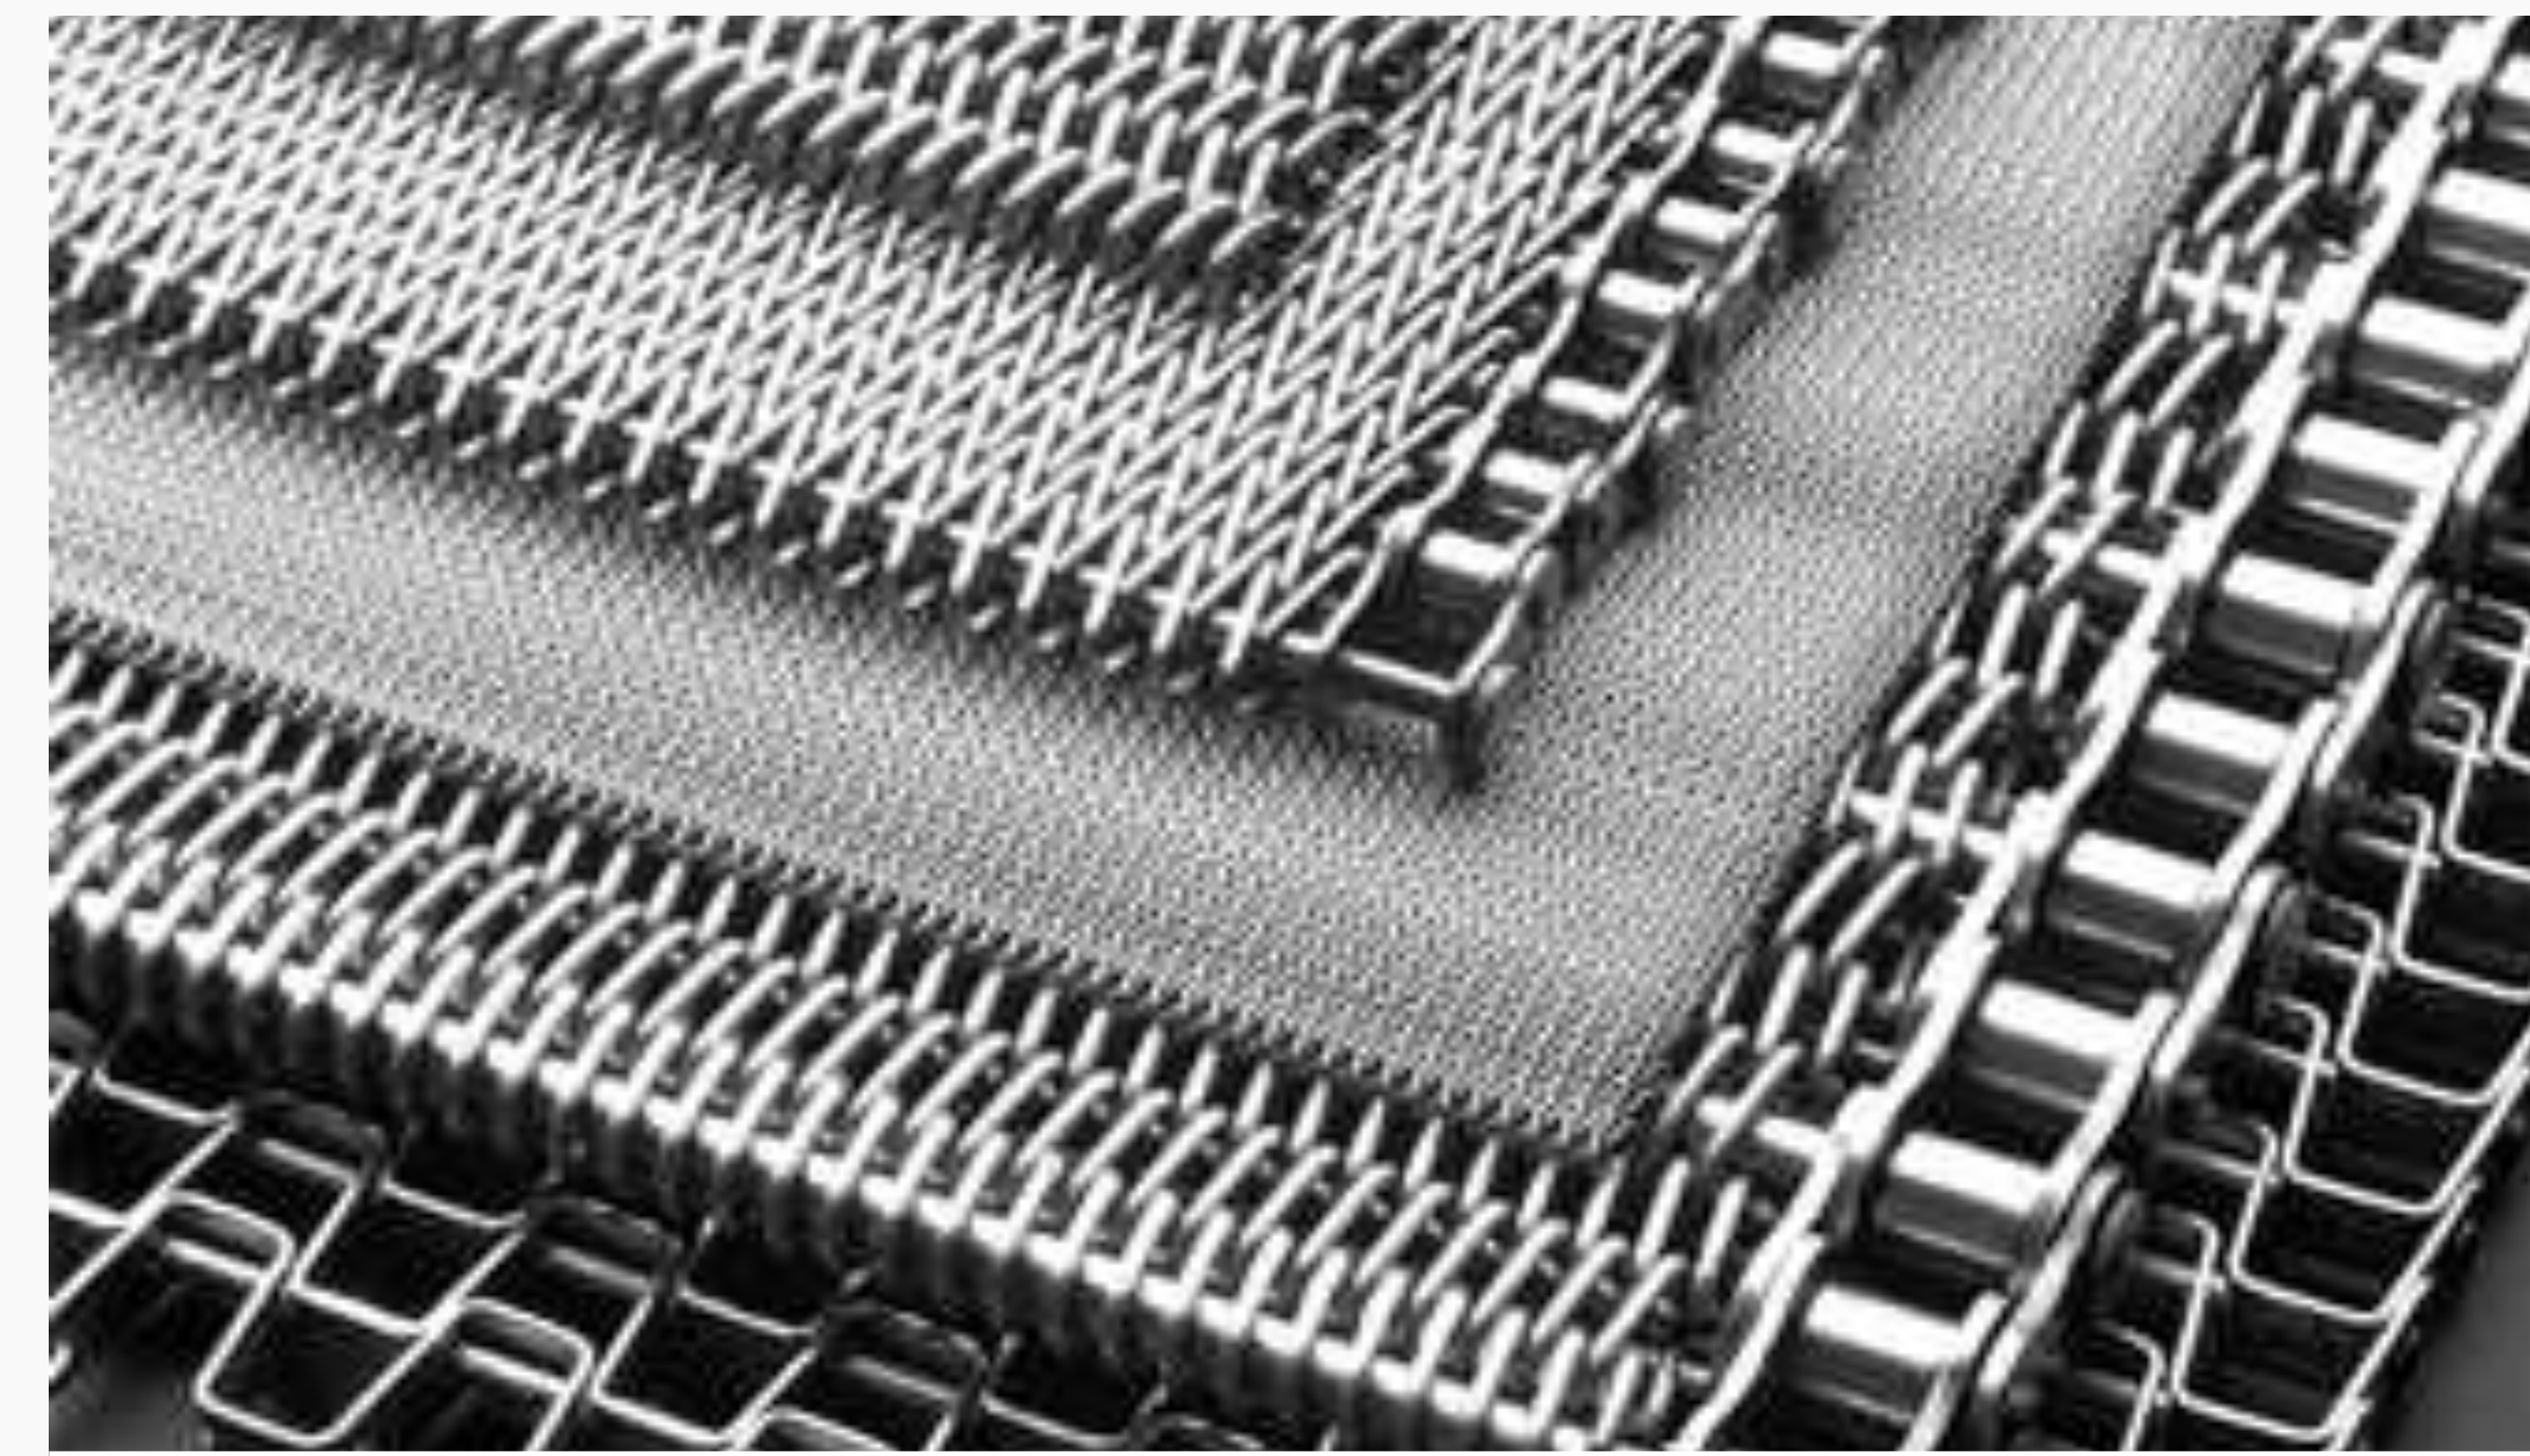

# Rubber Conveyor & Chevron Belts

Designed for efficient material handling in bulk transport and inclined conveying. Built for durability and grip, these belts ensure reliable performance in tough industrial environments.

## Wire Mesh Belts

We supply wire mesh belts designed for high-temperature and hygienic conveying applications. Their open structure allows excellent airflow and drainage, making them ideal for processes like cooling, baking, and drying—especially in the chocolate and confectionery industry.

## Table Top chains & Extruded profiles

Tabletop chains are designed for versatile conveying in industries like beverage, food, and packaging. They include engineered plastic chains for non-lubricated uses and steel chains for heavy-duty or abrasive conditions.

# Feeder & Teflon Belts

Feeder belts are designed for accurate and consistent material feeding in various industrial applications. Made from a high-friction, abrasion-resistant rubber compound, they provide strong grip and extended service life. The seamless construction ensures superior rotational stability and precise dimensions.

Teflon belts, including PTFE and silicone-coated types, are suited for high-temperature processes such as curing, sealing, and food handling. Their heat resistance and non-stick surfaces enable clean product release and reliable performance. Custom splices, edging, and tracking options are available to suit specific requirements.

## OTHER SERVICES

**On – Site Belt Joining**

**Mechanical Joining**

**Belt Repair**

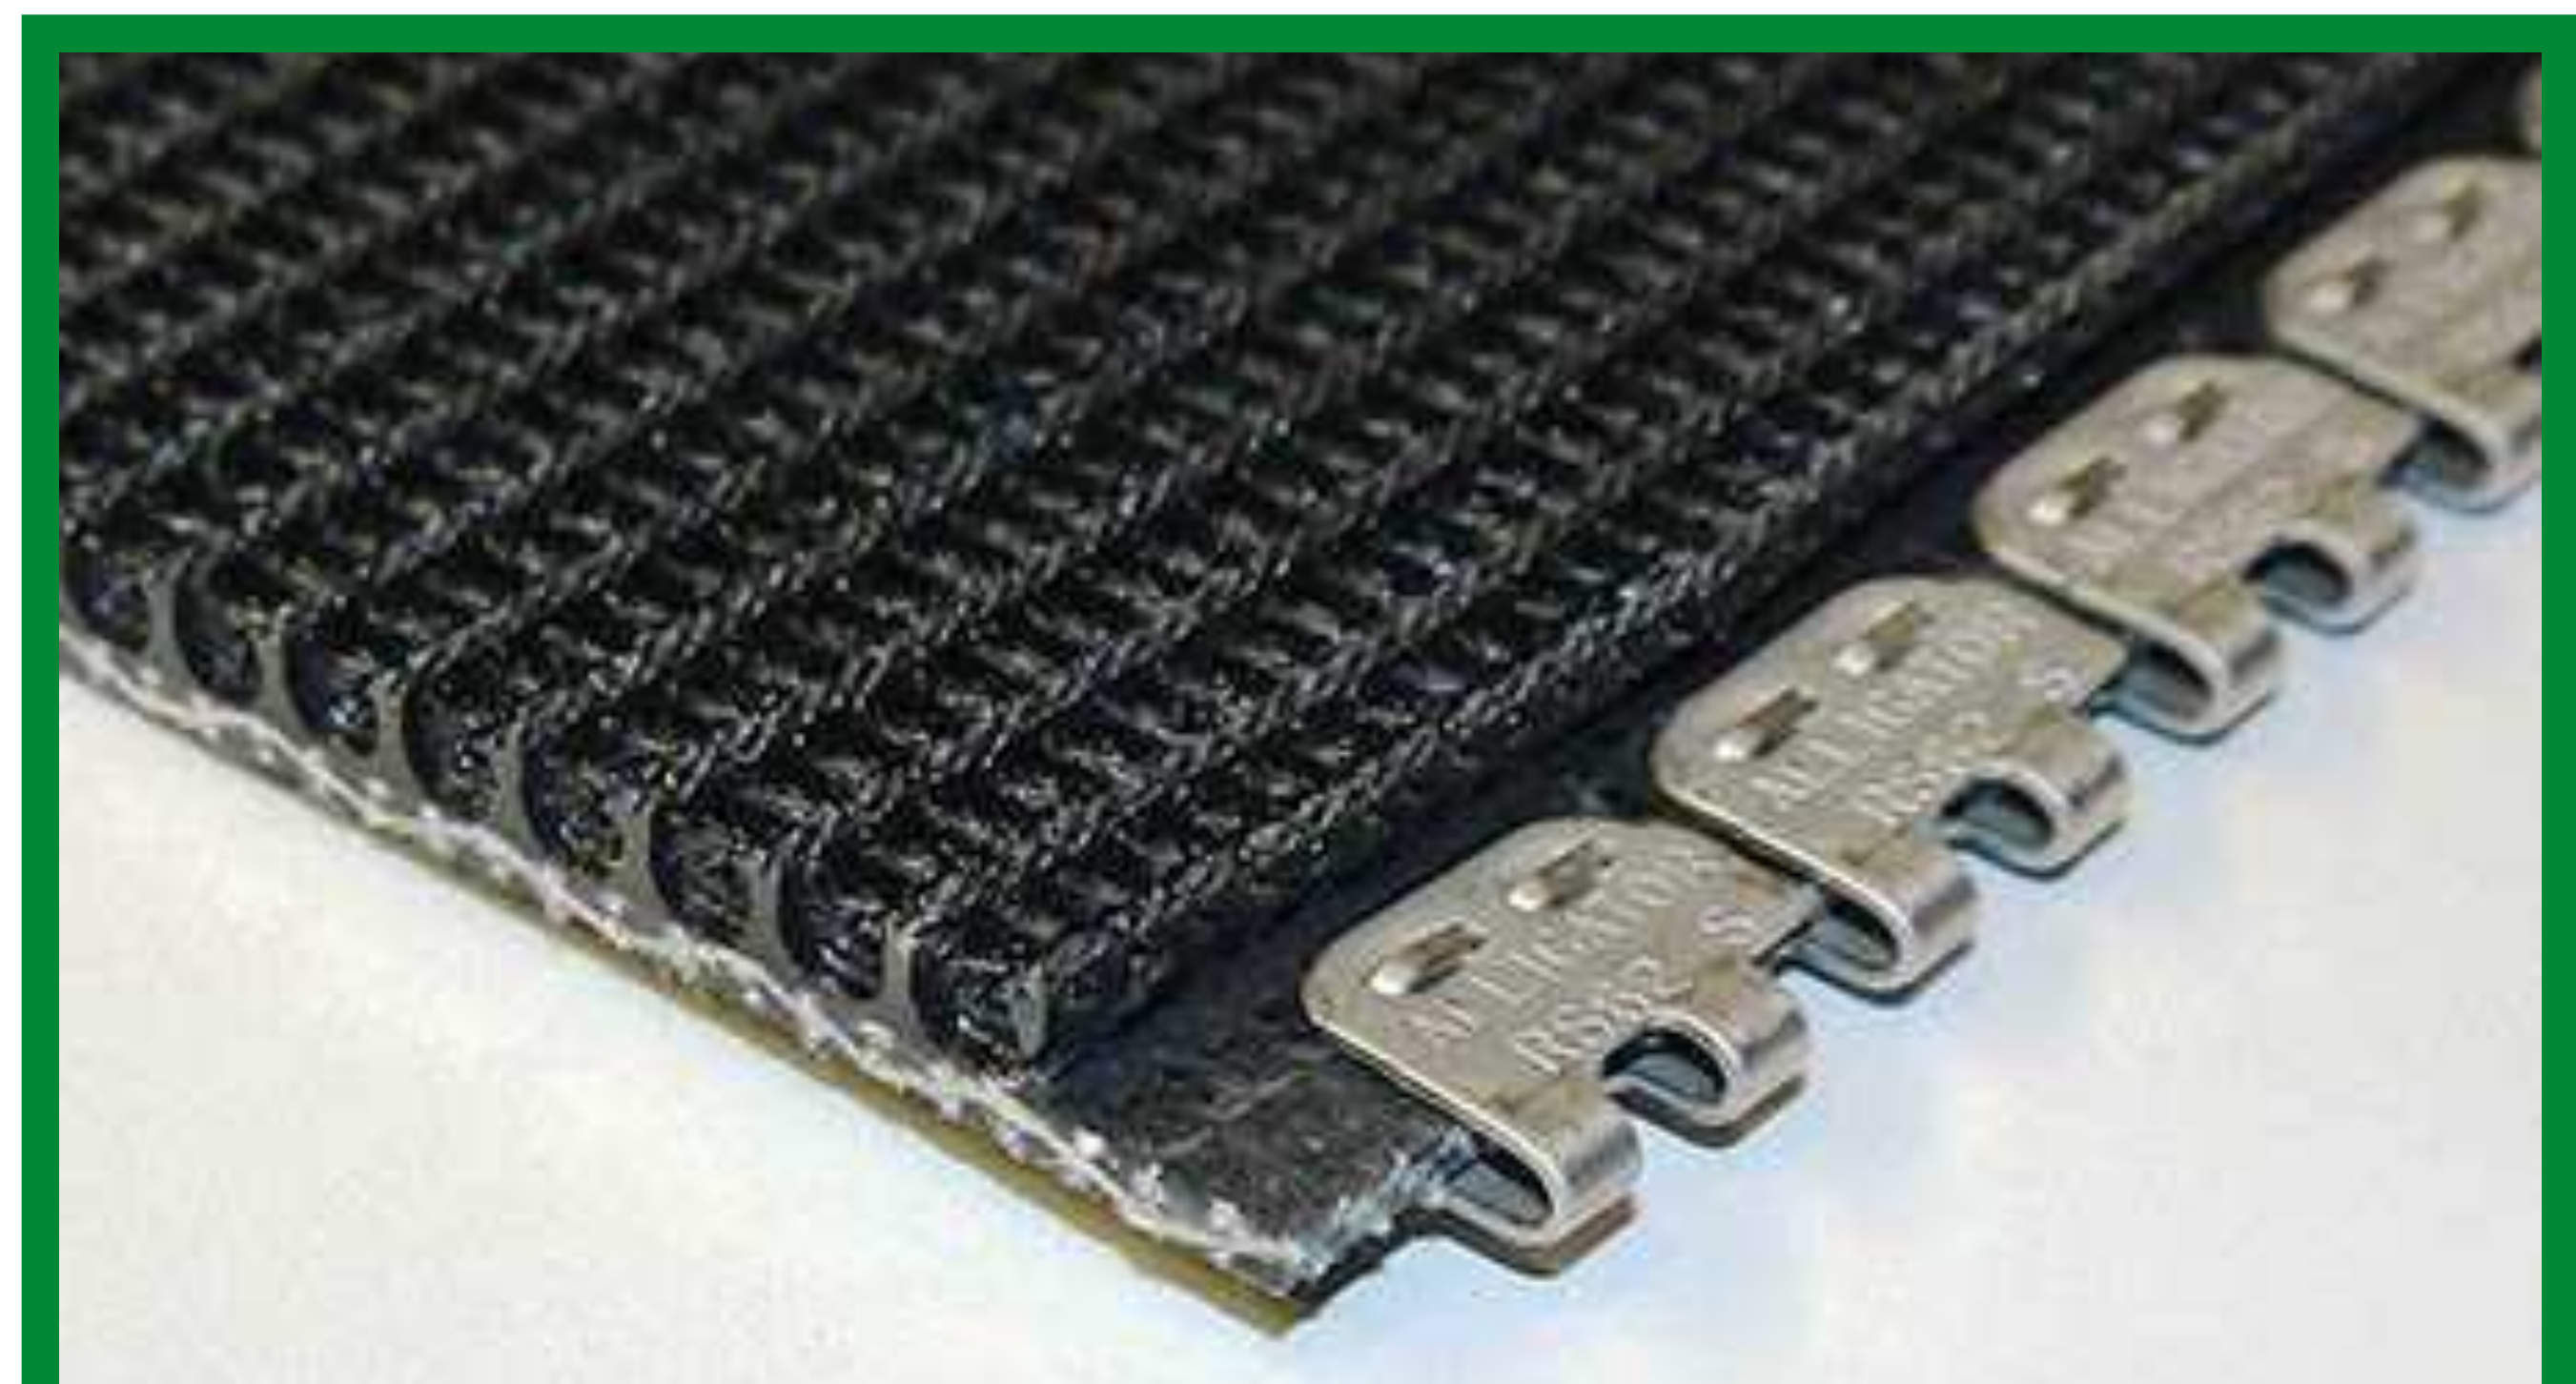

**Teflon Fabrication**

**Conveyor Maintenance**

# INDUSTRIAL TRADING PORTFOLIO

In addition to our core product lines, we offer a curated selection of industrial items sourced from trusted suppliers. Each product is chosen for its quality, compatibility, and ability to meet the demands of modern mechanical, electrical, and automation applications.
